Victorian Energy Upgrades

Reducing energy costs for Victorian households

Yvonne Collier, Spring Gully

"It was quick,
it was easy and
it saves energy.
That's good for
everyone."

Yvonne Collier, Spring Gully

Victorian Energy Upgrades is helping households save on energy bills and take action on climate change.

Energy upgrades for Yvonne Collier's home

Yvonne Collier of Spring Gully became interested in the Victorian Energy Upgrades program after seeing a presentation at her retirement village on how to save energy.

Through her local accredited provider, Ms Collier had her showerhead changed, added draught stoppers and installed an energy-saving switch on her television.

Since the upgrades, Ms Collier has seen significant savings on her energy bills through these very simple changes.

In addition, Ms Collier's home has become much more comfortable to live in, especially during the summer and winter months.

"If everyone does their bit, even in a small way, then that will help save the planet."

- Yvonne Collier

How the program works

Victorian Energy Upgrades is a Victorian Government program providing discounts on energy-efficient products and appliances for homes and businesses.

To view the energy-saving upgrades that are available and to find an accredited provider in your area, head to www.victorianenergysaver.vic.gov.au or call **(03) 9032 1310**.
