Victorian Energy Upgrades

Reducing energy costs for Victorian households

Roy Solterbeck, Brunswick West

"It's been win-win. Thousands saved on the installation, savings on energy which will help the environment - that I can pass on to my kids as well."

Roy Solterbeck, Brunswick West

Victorian Energy Upgrades is helping households save on energy bills and take action on climate change.

Energy upgrades for Roy Solterbeck's home

Roy Solterbeck became interested in Victorian Energy Upgrades because it provided an easy and affordable way to buy and install LED lighting.

After researching accredited providers, he found one that allowed him to upgrade to LED lighting across his entire home.

Mr Solterbeck's initial research showed that without the program he would have spent between \$6,000 to \$8,000 on lighting upgrades.

However, through Victorian Energy Upgrades and his accredited provider he reduced that cost to \$1,800.

In addition, due to his reduced energy consumption, Mr Solterbeck is now also benefiting with savings on his energy bills.

"It's not only about saving dollars, it's about everyone doing their little bit to help the environment."

- Roy Solterbeck

How the program works

Victorian Energy Upgrades is a Victorian Government program providing discounts on energy-efficient products and appliances for homes and businesses.

To view the energy-saving upgrades that are available and to find an accredited provider in your area, head to www.victorianenergysaver.vic.gov.au or call **(03) 9032 1310**.
