

Victorian
Energy
Upgrades

Helping your business to save on energy costs

Victorian Energy Upgrades is providing businesses with access to discounts on a wide range of energy-saving products through accredited providers.

The program can save businesses on average \$3,700 a year off energy bills. For larger businesses, dollar savings can run into the hundreds of thousands, depending on their upgrades.

How to access savings for your business

There are accredited providers across Victoria offering a variety of energy-saving products.

To find an accredited provider in your area head to www.victorianenergysaver.vic.gov.au.

Then choose the accredited provider that best suits your needs and book in a time for them to visit your business.

Once you decide to go ahead with the upgrade, track your bills and see the savings!

Discounted energy-saving products available

Lighting

Water efficiency

Hot water

Space heating and cooling

Custom upgrades

Commercial appliances

Appliances

Energy-efficient products may be available when you replace an inefficient product or buy a new one. To see what applies for the product you're looking for please visit our website: www.victorianenergysaver.vic.gov.au

How does Victorian Energy Upgrades work?

This Victorian Government program is providing households and businesses with access to discounted energy-saving products and upgrades through accredited providers.

Every upgrade allows accredited providers to generate Victorian Energy Efficiency Certificates.

Each certificate represents one tonne of greenhouse gas that has been prevented from entering our atmosphere.

Accredited providers then sell these certificates to energy retailers.

The Victorian Government sets annual greenhouse gas reduction targets that require energy retailers to buy a certain number of certificates.

In 2021, we're asking our energy retailers to help reduce Victoria's greenhouse gas emissions by 6.5 million tonnes through energy efficiency.

Under new emission reduction targets announced for the program, VEU will lock in 28 million tonnes of greenhouse gas emissions savings for Victoria between 2022 and 2025 – equivalent to taking more than 8.5 million cars off the road for a year.

However, all you need to remember is that Victorian Energy Upgrades is making it easier and cheaper for you to make energy-efficient upgrades for your business.
