

Looking for ways to make your house more comfortable and cheaper to run?  
Get a Scorecard assessment and clear up the confusion.

Are your power bills too high? Do you struggle to keep your home cool in summer and warm in winter? Find out new ways to improve your home's comfort and save on bills with a Victorian Residential Efficiency Scorecard assessment.

A Scorecard assessment gives your home a star rating, showing its cost to run. You get a detailed certificate to help improve comfort and performance, and tailored advice from your assessor.

Our Scorecard assessors are highly skilled and are accredited by the Victorian Government.

Private organisations deliver Scorecard assessments and do not represent the Victorian Government. Find out more at [www.victorianenergysaver.vic.gov.au](http://www.victorianenergysaver.vic.gov.au)
