10 star Scorecard home for those in need

“We’re extremely proud to be able to provide a home of this standard, that is modern, built to enable and provide high levels of care to people with disability. We’re hopeful that this is the first of many new 10 star builds for McCallum in the coming years,” he said.

McCallum Disability Services is a not-for-profit organisation that provides disability support services in the Central Highlands and Northern Grampians regions.

Want to build a comfortable home that is cheaper to run? Contact an assessor and organise a Scorecard assessment.

McCallum Disability Services has built a 10 star Victorian Residential Efficiency Scorecard (Scorecard) home with a difference. Their Lucas, Ballarat house is a dream home for people with a severe disability.

Lucas, Ballarat

10 stars is the highest possible rating that can be achieved in a Scorecard assessment and McCallum Disability Services Inc. achieved this by installing highly energy efficient appliances and dwelling materials, significant insulation and an 8kW Solar PV system.

Their recently built Ballarat home provides three full-time residents with a level of disability support they would never have dreamt possible. It features numerous advanced technologies to enhance their quality of life, such as smart lighting and blinds that can be operated via hand held devices and voice activation. It also includes tracking and hoist systems that help residents move around the house.

“This house was built to the highest disability standard under the Australian Livable Housing Guidelines and will enable our residents to flourish in a supported model of living”, said McCallum’s CEO Tyrone McCuskey.
